SKAKO Concrete Original Spare Parts

We keep your plant running

We understand the importance of fast and reliable spare parts service.

Customer service is an essential part of our business. In addition to installing your SKAKO Concrete equipment or carrying out the complete construction of your concrete plant, we can provide maintenance, service, support, and original spare parts for many years to come.

With our extensive inventory of original spare parts and our experienced team of experts, we can

guarantee exactly that. If you want to be sure of the quality and performance of your spare parts, we recommend that you always insist on using original SKAKO Concrete spare parts.

If you have any questions, you are always welcome to contact our spare parts support team by phone or email.

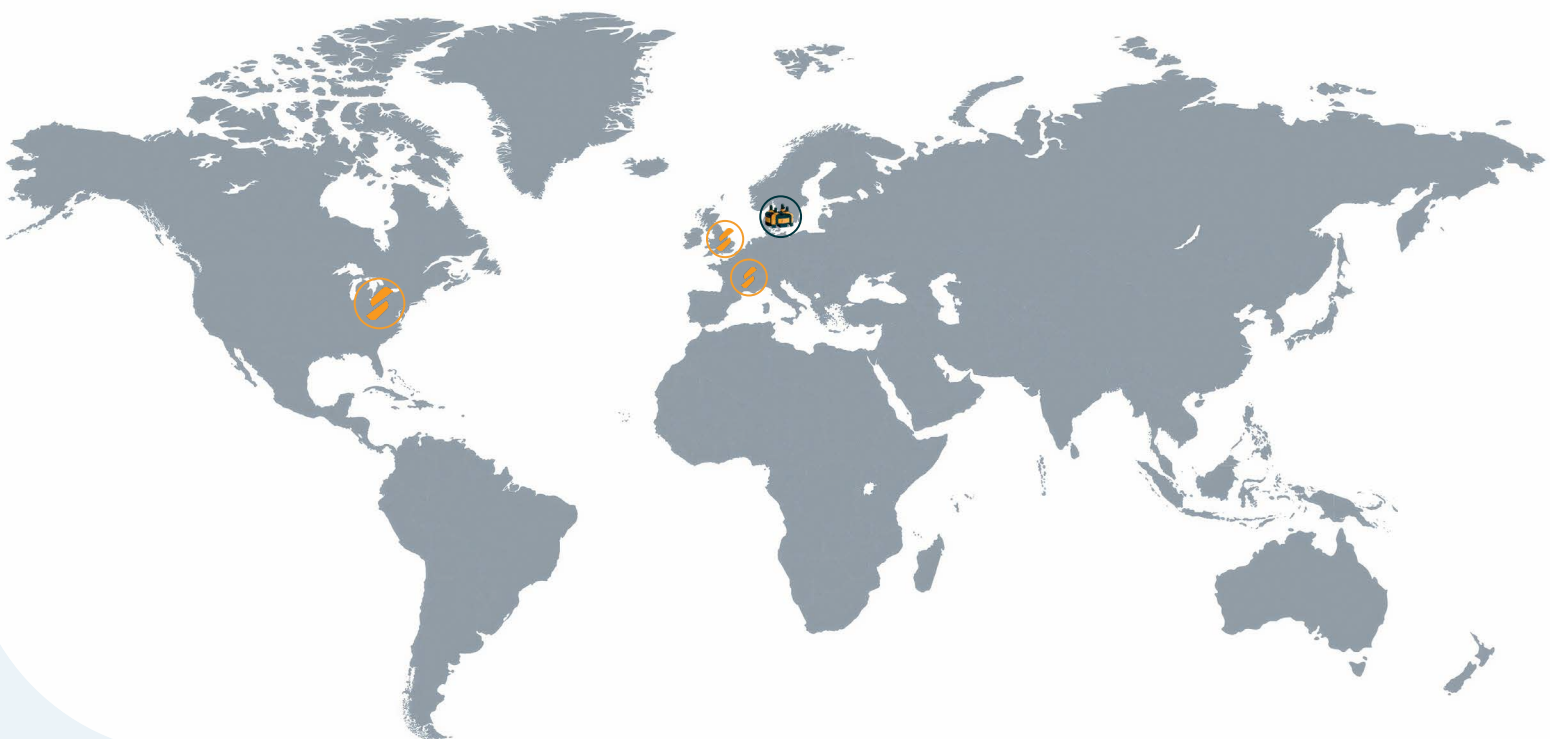

Visit our spare parts webshop at:
webshop.skakoconcrete.com/en/

- Warehousing in Denmark,
France, the USA, and the UK

MIXER Wear Parts

PUR parts for AM and SM mixers

SKAKO Concrete supplies original PUR parts for both AM and SM mixers. The components are developed by SKAKO Concrete and field-tested with selected customers to ensure high operational reliability and long service life. The optimized solution contributes to stable and consistent mixer operation while also reducing the need for frequent adjustments.

The products have been tested in various production environments and with a wide range of concrete mixes.

PUR shovels

SKAKO Concrete's PUR shovels are developed with a focus on high wear resistance, optimal fit, and efficient material movement inside the mixer.

The shovels are equipped with a specially designed insert that concentrates wear in the centre of the shovel. This helps preserve the shovel geometry for a longer period, resulting in extended service life and more stable operation.

The shovel design is optimized to ensure efficient lifting and movement of the material during mixing. The combination of the shovel angle and the curved front supports efficient mixing with low energy consumption.

Features

PUR shovels developed for high wear resistance and efficient material movement inside the mixer.

- Specially designed wear insert
- Wear concentrated in the centre of the shovel
- Preserves the shovel geometry for a longer period
- Extends component service life
- Optimized fit for SKAKO mixers
- Efficient material lifting and improved mixing
- Low energy consumption during operation

Rubber shovels

For more than 50 years, SKAKO Concrete has supplied rubber shovels for concrete mixers. The products are developed with a focus on wear resistance, optimal fit, and stable operation in demanding production environments.

The rubber shovels contribute to consistent mixing quality and reduce the risk of unnecessary downtime. The solutions are based on many years of experience and have been continuously optimized through practical use in the concrete industry.

Features

Rubber shovels for concrete mixers developed with a focus on operational reliability and wear resistance.

- More than 50 years of experience in development and supply
- Wear-resistant material for demanding production environments
- Optimized fit for SKAKO mixers
- Stable and consistent mixing quality
- Reduces the risk of unnecessary downtime

Mixer wear plates

SKAKO Concrete offers three types of mixer wear plates for concrete mixers: Nihard, Hardox 600, and Chrome Carbide.

All three types of mixer wear plates are stocked in Faaborg, enabling fast delivery—including next day (where possible).

SKAKO Concrete also offers replacement and installation of mixer wear plates at a fixed price.

Nihard

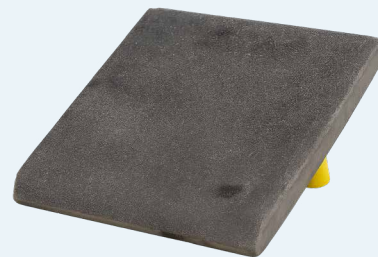

Wear-resistant cast iron material developed for high abrasive production environments.

Features

- Very high wear resistance
- High material hardness
- Suitable for abrasive materials
- Long service life in wear-intensive applications
- Proven solution in the concrete industry

Best suited for:

- Production with a high content of sand and aggregate
- Plants focused on maximum wear life
- Operations where impact load is moderate

Hardox 600

Steel bottom with high impact strength and good wear resistance.

Features

- High resistance to impact and shock
- Robust steel construction
- Good balance between wear resistance and flexibility
- Can be repaired by welding
- Reliable solution in varying production environments

Best suited for:

- Production with high impact loads
- Plants where flexibility is important
- Applications with diverse mixes and materials

SKAKO Concrete Chrome Carbide wear plates combine the properties of traditional steel with high wear resistance. The solution is designed to withstand heavy impact and can also be repaired when needed, providing a robust and flexible solution in operation.

Chrome Carbide

Advanced wear plate solution designed for maximum wear resistance in demanding environments.

Features

- Extremely high abrasive wear resistance
- Wear-resistant surface coating
- High resistance to impact damage
- Robust construction
- Long service life in harsh operating environments

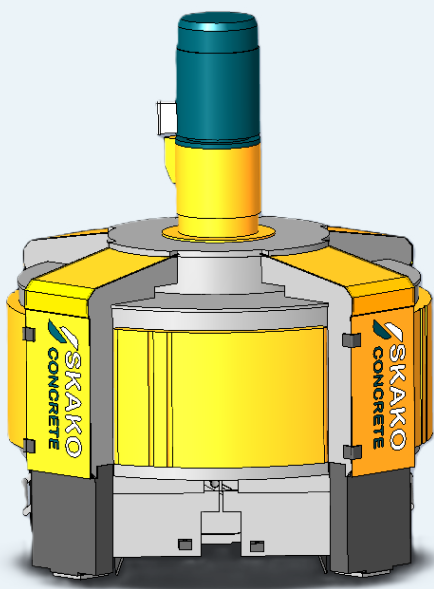

Best suited for:

- Highly abrasive concrete mixes
- Production with extreme wear exposure
- Plants where maximum service life is a priority

Know Your ATLANTIS Mixer

Key details and components at a glance

Safety system

Safety system for door openings with key interlock. The safety system meets prevailing quality and higher performance levels than required by/in EU safety standards.

Automatic cleaning

High-pressure cleaning system eliminates the need for manual cleaning of the inside of mixer.

Discharge gates

Detachable hatch with safety system for easy cleaning and maintenance.

Hydraulic powerpack

Manual discharge function ensures that discharge can take place in case of power failure.

Manual operation

Mixing tools can be easily adjusted into optimal position during servicing.

Shovels

Unique two-level shovel technology ensures better controlled high intensive mixing. Bolts are countersunk so concrete will not stick and old concrete will not get mixed in with new batches.

Inspection hatch

Inspection hatch on top of the mixer makes it possible to look into the mixer during the mixing process, without compromising safety. Optional with LED light.

Moisture control

Electrodes measure humidity in the concrete and automatically regulate addition of water via SKAKOMAT 600.

Water proportioning

Water proportioning device enables the addition of water during production. Different models available for different types of concrete.

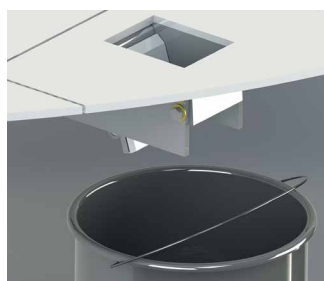

Airbag

Anti-dust airbag system prevents the dust from entering the work environment.

Inlet / skip hoist

Safe and dustproof inlet for skip hoist bucket. Inlet is closed when bucket is not in position. Large opening for fast discharge of materials into the mixer.

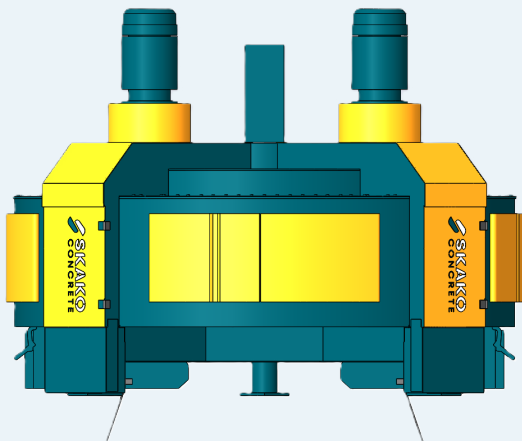

Sampler

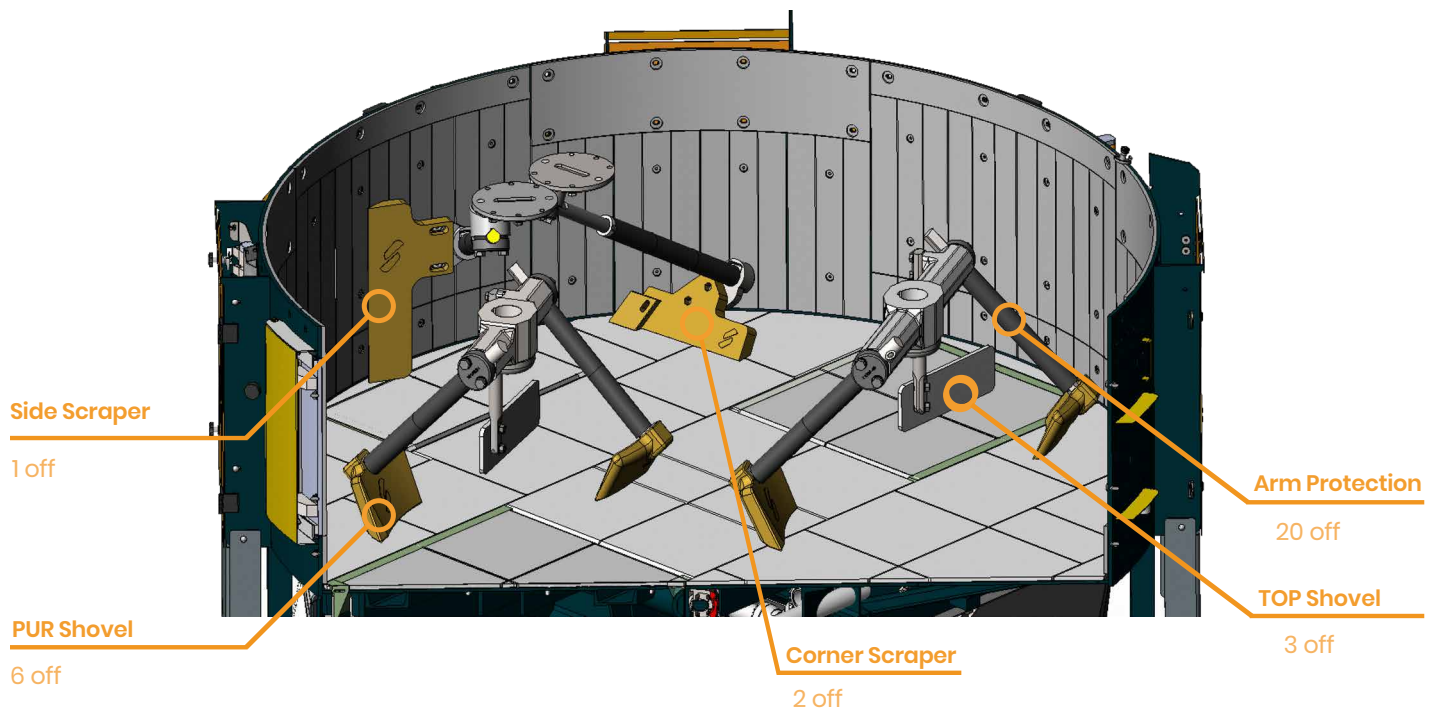

Semi-automatic, electro-hydraulic device for safe, easy and controlled extraction of concrete test sample.

Keep your Mixer Up to Date – Maximize your Output

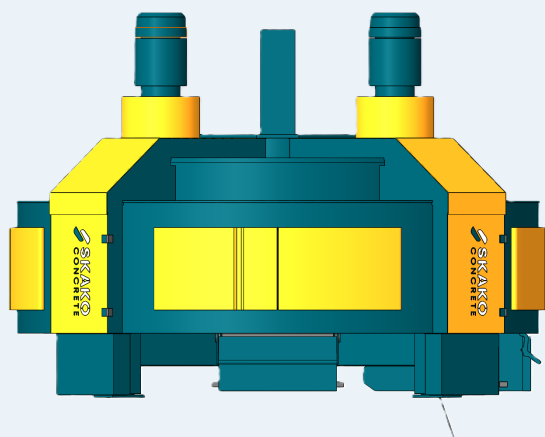

Easy access to wear and spare parts helps reduce downtime and keeps your production running efficiently.

- Easy access to wear and spare parts
- Reduced downtime during maintenance
- Fast replacement of critical components
- Less manpower needed throughout the mixer's lifetime
- Shorter cleaning time
- Faster discharging
- Shorter cycle times
- Savings in energy consumption
- Lower operating and maintenance costs
- Side-mounted hatches for safe and easy access
- Excellent visibility
- Self-lubricating gear in oil sump

Ready for a Service Agreement?

Discover the benefits of planned maintenance and reliable support.

With a SKAKO Concrete Service Agreement, you get planned maintenance, professional inspection and easy access to the right spare parts – helping you keep your mixer running efficiently throughout its lifetime.

- Planned service and maintenance
- Reduced risk of unexpected downtime
- Professional inspection of key components
- Easy access to recommended spare parts
- Improved reliability and performance
- Support from experienced SKAKO specialists
- Better overview of service needs and wear parts
- Helps extend the lifetime of your mixer

Contact us to learn more about the right service agreement for your mixer.

Global Warehousing. Local Support.

SKAKO Concrete has warehouse facilities in Denmark, the United Kingdom and the United States, among other locations, while also serving the DACH region's service market.

This gives customers easy access to spare parts and ensures a fast response when production requires service or maintenance.
